

daratechPLANT NEWsletter

Did you know that while

Bentley introduced OpenPlant PowerPID at daratechPLANT 2008 as the 1st product based on native ISO 15926, their Project-Wise Lifecycle Server product has been supporting this standard since the standards' inception.

Chairman's Message

It is a great honor to be named Chairman of the daratechPLANT 2009 Advisory Board. These are interesting and exciting times within the plant industries, and the chance to participate in the seminal conference on plant lifecycle technologies was just too hard to pass up. I think the TradeFair Group is an outstanding owner of the conference, and I think we will see their positive touch almost immediately.

As a starting point, they have created an industry driven conference program, that separates the acceptance of content/papers/presentations from the sponsorship program. I view this as a win/win, since quality presentations will bring in more owners and E/P/C's, making it even more valuable to sponsor and exhibit at daratechPLANT. The conference committee is represented by all sectors of the plant industries, including owners, EPC's and technology providers. We have committed to seeking out those people that are doing the exciting, innovative stuff in our industry and make sure that you get to hear from them.

The daratechPLANT conference has always been the benchmark from which we evaluate technology vendors and their development and successes in the industry. What incredible value it is to be able see demonstrations, talk to the key people, and compare technologies in two and one-half days! That part will continue to be a mainstay of the conference. The exciting part is adding substantially to the plenary and tracks sessions. The three unifying themes for the conference are:

Thought Leadership

Looking ahead at trends in the industry within the next 5 years

Pulse of the Industry

Comprehensive review of current technology available

State of the Practice

What is the industry doing with available technologies?

The program committee provides a forum to guide a conference that will have value, hit the key issues, and bring some answers to the many questions. I look forward to working with each of you to realize this objective. Here's to an interesting year

Joseph Morray, Jr., Chairman 2009 daratechPLANT Advisory Board
(President, Trinity Technologies Corp.)
